Technical Interview Preparation Checklist

This checklist provides a clear, professional guide to help you prepare effectively for any technical interview — whether you're in engineering, data science, IT, or another technical field.

1. Understand the Role and Company

- ☐ Review the job description carefully and highlight key responsibilities
- ☐ Understand what skills and tools the company is prioritizing
- ☐ Research the company's recent projects, values, and tech stack (if applicable)
- ☐ Learn about the interview format: number of rounds, interviewers, platforms used

2. Refresh Core Technical Knowledge

- ☐ Review key concepts in your domain (e.g., system design, analytics, networks, etc.)
- ☐ Be ready to explain fundamental principles behind tools or methods you use
- ☐ Prepare to solve applied problems or case studies relevant to the role
- ☐ Review your previous work or academic projects that relate to the job

3. Practice Problem-Solving

- ☐ Solve practice questions or case studies relevant to your field (e.g., logic problems, scenario-based questions)
- ☐ Focus on clear communication and structured thinking when solving problems
- ☐ Practice explaining your thought process out loud, as you would during the interview

4. Prepare for Behavioral Questions

- ☐ Draft and refine 4–5 professional stories using the STAR format:
  - Situation, Task, Action, Result
- ☐ Be ready to talk about challenges, collaboration, learning experiences, and achievements
- ☐ Align your answers with the company's values and the role's expectations

5. Mock Interviews

- ☐ Schedule at least one mock interview with a friend, mentor, or platform
- ☐ Practice answering both technical and behavioral questions under time pressure

- ☐ Ask for feedback and refine your responses accordingly

6. Technical Setup (for remote interviews)

- ☐ Ensure your computer, microphone, and camera are working properly
- ☐ Familiarize yourself with the interview platform (Zoom, Teams, CoderPad, etc.)
- ☐ Set up a quiet, distraction-free environment with a stable internet connection
- ☐ Have pen and paper or a digital notepad available for rough work

7. Final Preparation

- ☐ Prepare a concise self-introduction (your background, current focus, and what you're seeking)
- ☐ Review your resume and be ready to discuss any item in detail
- ☐ Prepare thoughtful questions to ask the interviewer about the team, role, and expectations
- ☐ Get a good night's sleep before the interview and avoid last-minute cramming

8. Post-Interview

- ☐ Send a thank-you email within 24 hours, summarizing your interest and key takeaways
- ☐ Reflect on the interview: what went well, what could be improved
- ☐ Note any unexpected questions for future preparation
- ☐ Follow up professionally if you haven't heard back within the expected timeframe

This checklist is designed to support candidates across all technical fields in presenting themselves with clarity, confidence, and professionalism throughout the interview process.
